1. Description

ED20W is a smart wristband based on LoRaWAN communication. Build in GNSS and Bluetooth module, can achieve indoor and outdoor real-time positioning combined with motion sensors. With wearing detection, it can realize real-time collection of health data such as heart rate, number of steps and sleep. The data will be transmitted to the platform through the LoRaWAN Network.

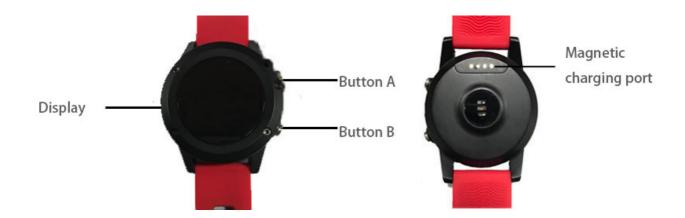

Application

- Smart safety solution for people working in industrial companies. Such as large oil&gas company, Power station company, chemistry company.
- Smart senior care, Isolating people from airport, hospital.

2. Features

- ✓ Communication via LoRa: communication range up to 1.5KM line-of-sight, $500 \sim 1000$ Meters in dense urban, compatible with any LoRaWANTM network.
- ✓ Build in GNSS+ Bluetooth chip, Indoor &outdoor real-time tracking
- ✓ Heart rate, number of steps: the measurements are made at a configured frequency and automatically send to the LoRaWAN™ network.
- ✓ **Real-time Alarm:** When the heart rate exceeds the standard, an alarm is sent.
- √ SOS in emergency
- ✓ **Long Battery Life**: Battery life as long as 7 days @ 15mins uplink duty cycle, a notification is sent when the battery power falls below 10%.

3. Interface

| Function | Description | | | |
|-------------------|--|--|--|--|
| Display | Display detection parameters | | | |
| Power On | Press and hold button A 3 seconds | | | |
| Power Off | ver Off Press and hold button A 10 seconds | | | |
| Switch the screen | een When the screen is off or in host interface, Press button A to switch the screen | | | |
| Check system | Dream button D to view the gratery recent and turn the recen | | | |
| manual | Press button B to view the system menu and turn the page | | | |
| SOS | Press and hold Button B 3 seconds to trigger SOS, the SOS alarm will display | | | |
| | on host interface if sent successfully to the platform. | | | |
| Charging | Use the standard magnetic charging cable to charge the device, can be fully | | | |
| | charged within 2 hours | | | |

4. Specification

| Parameters | Specification | | | | |
|-------------------|---|--|--|--|--|
| Modem | ISM Band LoRa® | | | | |
| Frequency | AS923MHz, US915Mhz, EU868MHz | | | | |
| Tx Power | Max +20dBm | | | | |
| Communication ran | ge 500~1000M in dense urban,1.5KM los | | | | |
| Positioning | Build in GNSS, Bluetooth and accelerometer, Positioning accuracy:5~20 | | | | |
| | Meters (Indoor positioning accuracy varies depending on Beacon | | | | |
| | density) | | | | |
| | 1. The default positioning interval is 15mins, supports wear detection | | | | |
| | 2. Automatically send a uplink message when power on the device, | | | | |
| | platform will send a downlink message. | | | | |
| | 3、The default downlink interval≥15s | | | | |
| Operating mode | 4. Trigger SOS will not change the positioning logic | | | | |
| Operating mode | 5. The wristband uplink positioning data, power information data and | | | | |
| | heart rate information according to the uplink cycle | | | | |
| | 6. The watch automatically detects the heart rate when wearing the | | | | |
| | wristband and it's on the heart rate detection page, It will displays the | | | | |
| | latest detection information after the detection is completed | | | | |
| Bluetooth | Low power consumption Bluetooth for indoor positioning | | | | |
| Display | 240*204 TFT Display | | | | |
| | | | | | |

| Rubber strap | 22mm standard size (Replaceable) | | | | |

| Dimensions | TYP. 48*52*14.5mm (W*L*H) | | | | |
| Weight | 50g | | | | |

Table 4.1 specification

5. Operation guide

5.1 Power on

- In the shutdown state, the device automatically turns on when connected to the charging cable.
- Press and hold button A 3 seconds to power on the device.

5.2 Join the Network

After turning on the device, it starts to search the LoRaWAN network and register to the network, when successfully connected to the LoRaWAN Network, the device will request UTC time synchronization from the server. The host interface will display the network signal, time and other information in the current environment.

5.3 Check system menu

Press button B to view the system menu and switch the page

Host interface-Message-Heartrate -Steps-Themes-System Version

5.4 Switch screen

When the screen is off or in host interface, Press button A to switch the screen

5.5 SOS

Press and hold Button B 3 seconds to trigger SOS, the SOS alarm will display on host interface if sent successfully to the platform. Press and hold again to exit. It will automatically quit after 20 minutes

5.6 Charging

Use the standard magnetic charging cable to charge the device, The smart wristband needs to be fully charged for the first time, and it takes about 2 hours.

5.7 Device positioning

The default GPS/Bluetooth positioning interval is 15mins, can be adjusted. You also can set the positioning interval in different period, no more than 4 period.

5.8 Motion detection

The equipment regularly detects the current position of the person, and when the movement is detected, the current location is updated to the platform in real time.

5.9 Power off

Press and hold button A 10 seconds to power off the device.

6. Package
